MEMORANDUM FOR SEE DISTRIBUTION

FROM: SAF/IAPX
1080 Air Force Pentagon
Washington, DC 20330-1080

SUBJECT: Revised Guidance for Stinger/Man Portable Air Defense Systems
(MANPADS)(DSCA Policy 03-10) (SAF/IAPX - 03028)

References: (a) DSCA Message, dtd 31 Dec 98, "Approved Revised Stinger/MANPADS
Guidance, DoD 5105.38-M Security Assistance Management Manual
(SAMM)"

(b) DSCA Policy 03-10, 4 Jun 03, same subject

This policy memo informs the Security Assistance community of revised guidance for the annual inventory stock in foreign countries of Stinger/Man Portable Air Defense Systems (MANPADS).

The 1998 DSCA message (Atch 1) reduced the annual inventory requirement of Stinger missile stocks in foreign countries from 100 percent to 5 percent. In lieu of recent world events and the need to enforce global controls of Stinger/MANPADS, DSCA reissued policy guidance (Atch 2) to revise the annual inventory of Stinger missile stocks back to the standard of 100 percent. The DSCA policy memorandum provides further clarification for inventory reporting procedures and format.

The attached SAMM change is effective immediately and replaces paragraph 20301.K of the SAMM (E-Change 45). SAF/IAPX POC is Ms. Sandy Harding, (703) 588-8974, DSN: 425-8974, email: sandy.harding@pentagon.af.mil.

//signed 20 June 2003//TERRY L. BATES
Chief, Security Assistance Policy Division
Deputy Under Sec, Int'l Affairs

Approved Revised Stinger/MANPADS Guidance in DoD 5105.38-M, Security Assistance Management Manual (SAMM)

31 December 1998

From: SECDEF Washington DC/DSCA

311931ZDEC98

UNCLAS

Subject: Approved Revised Stinger/MANPADS Guidance in DoD 5105.38-M,
Security Assistance Management Manual (SAMM)

1. The proposed change to the SAMM pertaining to subject, distributed in message DTG 012256Z Dec 98, elicited only a few responses. Based on those responses and other info at hand, changes in paras 2 and 3 below will be made to the SAMM by DISAM. They are effective immediately.
2. Paras 70105.L.9.C. and D. are deleted. Guidance therein, as revised, is included in para 20301.K. below.
3. Para 20301.K. will read as follows:

*“K. **Stinger/MANPADS.** SEC 532, Foreign Operations, Export Financing, and Related Programs Appropriations Act, FY94 continues the prohibition on provision of Stinger to countries bordering the Persian Gulf (Iraq, Iran, Kuwait, Saudi Arabia, Qatar, United Arab Emirates, and Oman). Based on circumstances discussed in Sec 581 of the 1990 version of this Act/PL 101-167, this does not apply to Bahrain” one-for-one purchase of replacement missiles.*

“1. The IA, through DSCA, will request DOS to ensure that any transfer of MANPADS under FAA Sec 506(A) (SAMM 1102) include security requirements in para 70105.L.9. The IA will also ensure foreign production agreements incorporate these requirements.

“2. The following procedures apply when an LOA for the purchase of MANPADS has been accepted, or-production arrangements have been implemented, or MANPADS are provided under authority of Sec 506(A).

“A. The USA will provide a copy of the transfer authority document to the in-country SAO.

“B. USA personnel will inspect the physical security arrangements prior to the delivery of the first shipment of MANPADS to ensure that security meets US requirements.

“C. The USA will notify the SAO when delivery of the missiles is to begin, including serial numbers for each increment of missiles and gripstocks or other launchers to be received.

“D. The SAO will arrange with the recipient to verify, by serial number, receipt in country of the missiles and launchers. Verification of receipt should be reported by the recipient to the SAO and the USA.

“E. Except for missiles deployed to hostile areas, the SAO must complete a 100 percent physical inventory, by serial number, of Stinger missiles and weapon rounds (missile and gripstock). This inventory is to serve as further confirmation of recipient capabilities to secure and account for these items. It is to occur after initial shipments of missiles are placed in long term storage or with operating forces. It should be completed not later than one year following receipt of the first missile in country. The inventory should include review of the recipient’s records of monthly two man verifications. Unless accountability problems indicate the necessity for such action, the sealed missile and weapon round containers will not be opened during the inventory. Inventory results are to be provided to the DSCA regional directorate and USA (USASAC), with an information copy to the applicable UCOM.

“F. The SAO will also physically inventory five percent of in-country stinger missiles annually. The five percent will be selected based on one or a combination of the following: (1) A random selection of serial numbers from the overall country inventory list, without regard to location; (2) 100 percent inventory of sufficient storage locations, selected at random, to provide an overall five percent quantity; or (3) an inventory plan designed by the SAO which considers unique country or regional security requirements.

“G. The CINC may determine, based on assessment of the threat to security in the area, that other special actions are necessary. DSCA/COMPT should be informed of these determinations.

“3. The USA must provide to DSCA/MEAN-AP, by 1 Dec each year, a report of Stinger Missile delivery quantities. Report data should include the quantities from each major source (For Example, FMS, FAA 506(a), Stinger Production Group and other foreign production program) delivered to each recipient. The USA will also provide advice and other technical support, normally short of TDY, to assist SAOs in missile inventories or other accountability measures.”

The DSCA contact is Ms. Jeanne Farmer, CML (703) 604-6609, DSN 664-6609, FAX 604/664-6541, or e-mail farmer@osd.pentagon.mil.

MEMORANDUM FOR SEE DISTRIBUTION

SUBJECT: Revised Guidance for Stinger/Man Portable Air Defense Systems
(MANPADS) (DSCA Policy 03-10)

REFERENCE: DSCA Message 311931ZDEC98 dated 31 December 1998 "Approved Revised Stinger/MANPADS Guidance in DoD 5105.38-M, Security Assistance Management Manual (SAMM)"

Recent world events, like the attempted shoot down of the Israeli aircraft in Kenya, the Global War on Terrorism, and 9-11 have dictated that the United States take the lead in addressing the proliferation of MANPADS. By direction of the NSC, the USG has made it a priority to adopt strict, global controls of MANPADS and its essential components, with the goals of strengthening controls in producer countries, and greatly reducing the potential for unauthorized or unfavorable retransfer and misuse.

The referenced DSCA message lessened the annual Stinger annual inventory of 100 percent of Stinger missile stocks, in foreign countries to an annual inventory of five percent. DSCA has reviewed its current Stinger/MANPADS Guidance and has determined that the current requirement for the annual inventory of Stinger missiles stocks needs to return to the standard of 100 percent annually. This memorandum changes our policy accordingly and provides clarification on inventory reporting procedures and format.

The attached SAMM Change is effective immediately and replaces paragraph 20301.K of the SAMM (E-Change 45). If you have any questions regarding this matter, please contact Mr. Leon Yates, DSCA/P3-P2, Voice (703) 601-3865 (DSN 329-) FAX (703) 604-6547 (DSN 664-) NIPRNET Leon.Yates@dsc.mil, SIPRNET Leon.Yates@dsc.osd.smil.mil or Ms. Gaby Zurita at DSCA/P3-P2, Voice (703) 601-3856 (DSN 329), FAX (703) 602-0075 (DSN 332-), NIPRNET Gabriela.Zurita@dsc.mil, SIPRNET Gabriela.Zurita@dsc.osd.smil.mil.

SAMM Change E-45

Paragraph 20301.K is deleted in its entirety and is replaced as follows:

K. Stinger/Man Portable Air Defense System (MANPADS). Any transfer of Stinger/MANPADS must include the security requirements notes shown in paragraph 70105.L.9. The Implementing Agency will also ensure any foreign production agreements incorporate these requirements. The following procedures apply when (1) an LOA for the purchase of a MANPADS is accepted, (2) co-production arrangements are implemented, or (3) MANPADS are provided under the drawdown authority of FAA, section 506(a). (See section 1102 for more information on drawdowns.)

1. The U.S. Army will provide a copy of the transfer authority document to the in-country SAO.
2. U.S. Army personnel will inspect the physical security arrangements prior to the delivery of the first shipment of Stinger/MANPADS to ensure that security meets U.S. requirements as stipulated in the transfer agreements.
3. The U.S. Army will notify the SAO when delivery of the missiles is to begin, including serial numbers for each increment of missiles and grip stocks or other essential components.
4. The SAO will arrange with the recipient to verify receipt in country of the missiles, grip stocks, and other essential components, by serial number, except for missile systems deployed to hostile areas. The recipient and an USG representative will verify receipt to their Combatant Command Headquarters and the U.S. Army. This inventory serves as further confirmation of the recipients' capabilities to secure and account for the Stinger/MANPADS and essential components. It occurs after initial shipments of missiles and/or grip stocks are placed in long-term storage or with operating forces. This inspection/inventory shall be completed not later than thirty days following receipt of the first missile in country, or the return of previously exempted missiles from the hostile area.
5. Except for missiles deployed to hostile areas, the SAO will physically inventory 100 percent of in-country Stinger missiles, grip stocks and other essential components annually. The inventory must include review of the recipient's records of monthly two-man verifications as required by the Stinger/MANPADS LOA or other arms transfer document note. Unless problems indicate the necessity for such action, the manufacture sealed missile and weapon round containers should not be opened during the inventory. Inventory results (initial and annual reports) are provided to the respective Combatant Command Headquarters and U.S. Army.
6. The Combatant Commands will ensure that the SAO establish procedures that facilitate the purchaser to be able to report within 5 days any instances of compromise, unauthorized use, loss or theft of Stinger/MANPADS materiel or

related information. Reportable instances will be investigated, and proposed corrective measures developed to ensure that there is not a recurrence. Within 15 days of the completed investigation, the SAO will forward these investigative results and proposed corrective action to their Combatant Command Headquarters, DSCA (Policy, Plans and Programs Directorate) and U.S. Army.

7. The Combatant Commander and/or Director, DSCA may determine, based on assessment of the threat to security in the area, or other compelling reasons, that other special actions are necessary for either an additional inventory or less than 100 percent inventory. If this determination is made, the Combatant Commander or Director, DSCA will notify each other's respective Headquarters in writing at the General Officer/Flag/SES level.
8. By 1 December of each year, the Combatant Command Headquarters will consolidate and provide an inventory report of Stinger missiles and essential components within their Area of Responsibility to DSCA (Policy, Plans and Programs Directorate). Additionally, by 1 December of each year, the U.S. Army will provide a report of Stinger missile deliveries, by quantities and source to DSCA (Policy, Plans and Programs Directorate) and the applicable Combatant Command Headquarters.
 - a. The Combatant Commands' annual inventory report will indicate by country, transfer source (i.e., FMS; FAA, section 506(a); Stinger production group and other foreign production programs), the date of the completed inventories, projected inventory dates, resources expended for compliance, i.e., man hours and travel cost, quantity of missiles and grip stocks on hand, and expended missiles and grip stocks during the reporting period and how they were expended.
 - b. The Army's reported data will include the quantities of missiles and grip stocks from each source (i.e., FMS; FAA, **section 506(a)**; Stinger production group and other foreign production programs) delivered to each recipient during that year. As requested, the U.S. Army should provide advice and other technical support to assist SAOs in missile inventories or other accountability measures.
